Building on a partnership of more than 15 years that began in 2009 in Brazil, ID Logistics yesterday inaugurated the AB InBev France site in Neuillé-Pont-Pierre (37), together with AB InBev management, representatives of the Community of Municipalities and the Neuillé-Pont-Pierre City Hall, as well as the site's employees. Since March 2024, ID Logistics has been responsible for the reception, preparation and dispatch of orders. The new site covers the entire western part of France and will be joined by a second site located in Cambrai (59) which will start operations in November 2024, thus meeting AB InBev France's need to optimize the distribution flows of its retail and hospitality networks.

BEST-IN-CLASS INNOVATIONS AND TECHNOLOGIES AT THE SERVICE OF CUSTOMERS AND EMPLOYEES

The AB InBev France and ID Logistics teams have worked hand in hand since the announcement of this new partnership to ensure operational excellence that meets the highest standards through innovations and best-in-class technologies integrated into the processes.

To ensure reliability and perfect optimization of order picking and costs, ID Logistics uses:

- **Free Scan:** an automated barcode scanning system integrated into the trolleys that facilitates the work of the order picker thanks to better ergonomics and increased safety.
- **Beacon technology:** these are placed on the dock doors and validate the loading of the right pallet into the right truck. The customer's shipping process is more ergonomic, more reliable and significantly reduces dockside stays and shipping errors.
- **Best Dock:** this software assigns pallets to the nearest dock during receipts and thus avoids unnecessary trips by reducing the distances travelled by the pickers.

The safety of ID Logistics' employees is not only ensured by prevention and training tools (Securitab, e-learning, safety day, digitalized AIC, etc.) but also thanks to advanced prevention technology in the form of an innovative anti-collision tool:

- **Hit-Not:** this system prevents human/machine collisions in the warehouse thanks to a transmitter and receiver on the picking trolley. The technology beeps when the pedestrian approaches the truck, alerting to a possible collision.

AB INBEV, A PLAYER RESOLUTELY COMMITTED TO REDUCING ITS CARBON FOOTPRINT

A clear objective set by AB InBev France, committed to a responsible and environmental approach to all its activities, a new software - Yard Management System - ensures optimal management of truck entries, waits and routes, avoiding their downtime as much as possible and optimizing flows.

Finally, the Neuillé-Pont-Pierre site meets AB InBev France's environmental commitments as it is BREEAM certified. It has LED lighting, a rainwater recovery system and has been designed to accommodate photovoltaic panels on the roof.

"This new partnership with AB InBev France demonstrates the confidence in our expertise in the consumer goods sector. Our teams have worked hand in hand to ensure that AB InBev France provides logistics services at the highest level for France and Europe. We are proud of this new collaboration, which is perfectly in line with the Group's growth dynamic." - **Eric Hémar, Chairman of the ID Logistics Group**

"The inauguration of the Neuillé-Pont-Pierre site is an opportunity for us to warmly thank all the players involved in the implementation of this project, which is a real success for AB InBev France. Together, thanks to everyone's commitment, AB InBev France reaffirms its commitment to better meet the needs of its customers while strengthening its commitment to the environment." - **Pieter Anciaux, Managing Director of AB InBev France.**
